

## Life Prediction Tools

## Livemonitor Software

You can diagnose the life of Hagiwara Flash Storages, using Livemonitor software.

You can export the log data.

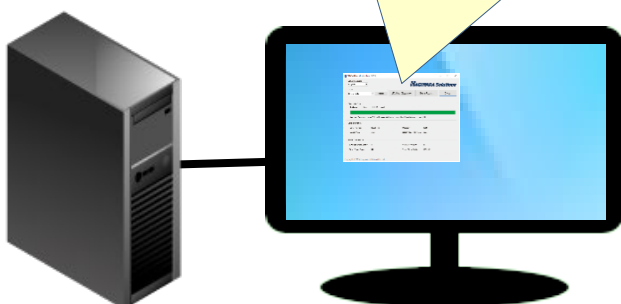

\*Excel format

### Life Indicator

- **Green :**
  - Rest of life: **more than 20%**
- **Yellow :**
  - Rest of life: **10% to 20%**
- **Red :**
  - Rest of life: **less than 10%**

GUI supports visual management.

\*We also offer you **API**.

## Features

### Device Information

- S.M.A.R.T. Values
- Temperature
- Life Estimate

### Access Analysis \*1

- Read/Write Ratio
- Data Transfer Size Ratio
- Sequential Access Ratio

### Device Settings \*2

- Perform Secure Erase
- PSID Revert to reset TCG Opal settings
- Enable eDrive (IEEE1667)

### Block Information \*1

- Drive Map
- Utilization Rate
- Erase Count
- Read Count
- Reallocated Count

### Other Functions \*2

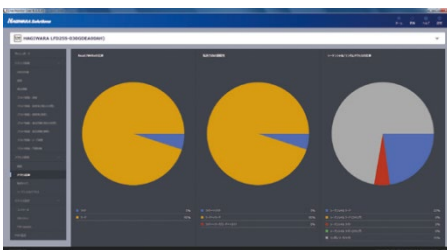

- Firmware Update
- PDF Report

\*1: Compatible SATA 6.0Gbps models only.

\*2: Target SSD must have corresponding functions.

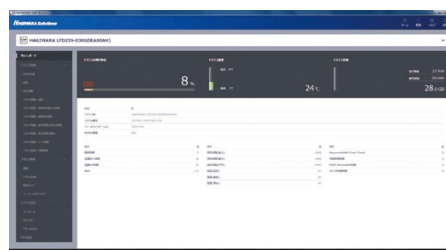

## Drive Monitoring

### Access Pattern Analysis

Provides in-depth SSD access pattern analysis for system performance optimization.

### Access Analysis \*1

Provides accurate life estimation based on real usage data.

### Block Information \*1

Visualizes SSD usage at block level to help determining optimal device configuration for maximized life.
